Inclusion Ghana is a network organisation working to reduce stigmatization and ensure full inclusion of all persons with intellectual disability and their families by advocating for their rights and needs.

Inclusion Ghana is a member of Inclusion International, the global federation of family-based organizations advocating for the human rights of persons with intellectual disabilities that has over 200 member federations in 115 countries throughout five regions including the Middle East and North Africa, Europe, Africa and the Indian Ocean, the Americas, and Asia Pacific.

HOW DID INCLUSION GHANA START?

The fundamental building block for Inclusion Ghana was the 2006 decision of a group of Non-Governmental Organisation leaders in Ghana working with persons with intellectual disabilities (PWID) to create a platform that unifies the voices of PWID and their families. It was difficult to agree on a common structure then. In 2007, these organisations requested Landsforeningen LEV in Denmark to facilitate the process of establishing an umbrella organisation to co-ordinate and strengthen information sharing, networking and cooperation between organisations working with PWID. Discussion continued until 25th November, 2009 when Inclusion Ghana was formally established and duly registered with the Registrar General’s Department.

WHAT DO WE DO?

Inclusion Ghana works through non-governmental and community based organizations to offer services to persons with intellectual disabilities and their families and advocate for their rights and needs. To achieve this, Inclusion Ghana has identified four key intervention areas:

Training
- Strengthening the capacity and existing institutional and organizational structures of member organisations to support their quality service delivery to persons with intellectual disability and their families

Research
- Identifying and promoting research that will improve the lives of persons with intellectual disability and their families

Education
- Maintaining an authoritative body of intellectual disability information and knowledge
- Supporting proactive community outreach and education of member organisations
- Providing accessible and relevant information that supports stakeholder ability to make informed choices

Advocacy
- Advocating for inclusion, and participation in all aspects of life for persons with intellectual disability and their families
- Proactively informing, influencing, guiding and developing public policy at the community, regional and national levels in collaboration with the greater disability community
- Supporting court action or other initiatives by Parents of Persons with disability
